

*Jacket Button attaching machine  
with backing button option*

Security showstitch

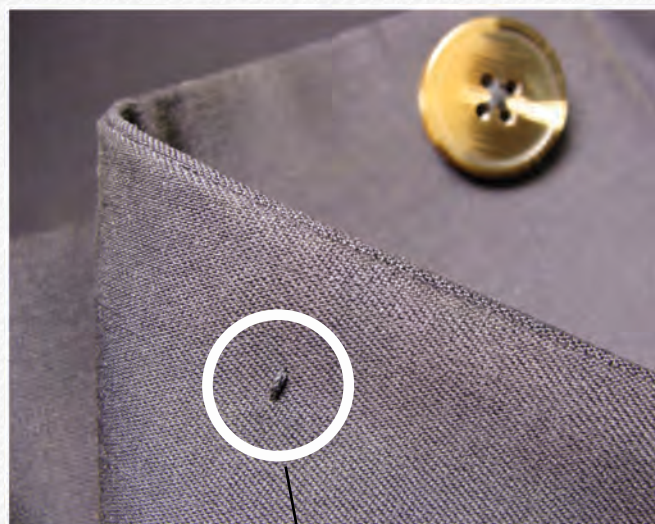

For a perfect result wrap the  
shank on an MMS automatic  
wrapping machine

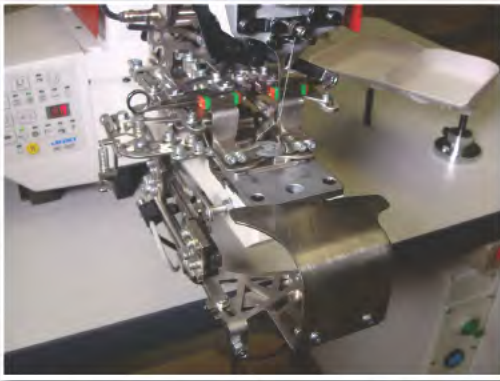

Instant selection of pre  
programmed stitch patterns

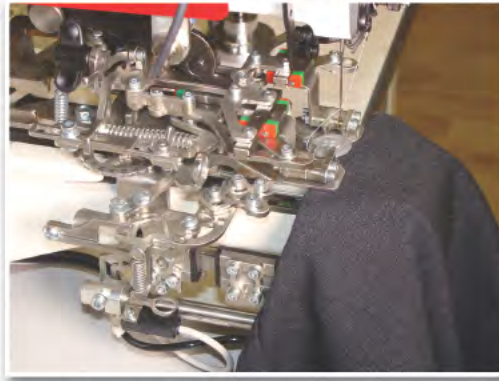

- Showstitch option to give high quality 'tailored' appearance to back of jacket fabric.
- Instant and precise shank height adjustment.
- Conventional stitched through or showstitch option with the accurate and simple to use loading blade.
- Any stitch pattern available at the touch of a button.
- Fully electronic chainstitch machine - quiet and fast.
- Equipped with the unique button holding clamp which is able to securely hold buttons from 8mm diameter up to 46mm diameter without the need to reposition the clamp in relation to the needle.
- Simple change over to backing button option.

Simple to use loading blade ensures accurate show stitch.

Simple adjustment of shank height and unique linear button clamp means holding large or small buttons can be achieved with no adjustment.

BAT 18 shown mounted in tandem with a mk.11 button shank wrapping machine.

## Result

Perfect button attachment which simulates a hand sewn jacket button. When the button is subsequently secured using the MMS heat seal wrapping system it is also protected against button loss for the lifetime of the garment.

## Specifications

**Air supply**  
Min. 5 BAR

**Air consumption**  
1.5m cubed / hour
